

Kraftex Seal Coat Instructions

Congratulations on the purchase of your Kraftex Seal Coat – another quality home product made by Pratley.

Kraftex Seal Coat is a quick-drying, mineral-based transparent sealant/varnish which is easy to use and is virtually odourless.

It is intended for use on decoupage and other general craft projects (especially for the sealing of difficult objects such as ostrich eggs), and is ideal for use in conjunction with Kraftex Creative Cracks and Kraftex Antique Cracks.

Instructions

1. Make sure that the surface which you are coating is completely dry.
2. Pour the required amount of Seal Coat into a container and immediately close the bottle to stop evaporation.
3. Brush coat your surface relatively quickly – Seal Coat dries rapidly and soon becomes tacky.
4. Clean brush with methylated spirits.

Tip	Why
1. Test compatibility of Seal Coat with ink surfaces before using.	1. Seal Coat may cause ink to run.
2. Test compatibility of Seal Coat with the paint you are using on scrap wood/paper first.	2. Seal Coat may cause certain paints to run.
